

Public Health List of Communicable Diseases

Please circle all that applies to your child

A report must be made to Hamilton Public Health Services as soon as possible when it is known that a child, member of the staff, or volunteer has or may have a disease of public health significance (list below). Call 905-546-2063 to make a report. It is not necessary to confirm or get a diagnosis from a physician prior to reporting an infectious disease. Reports to Hamilton Public Health Services may be made on the basis of information obtained from the child's parent or based on the observations by the staff. Below is the list of diseases of public health significance that must be reported as per [Ontario Regulation 135/18](#);
